**Subject:** Dimock Maps

Humane:

Here is the link to the maps. Flattened maps are maps where the layer with well names was removed and the file was "flattened."

L:\Share\CERCLA Records Center\DIMOCK MAPS FOR REDACTION

As we discussed - Dimock10 (hanging in you office) was redacted (and flattened.) [It appears our Records Management Consultant (which is the technical term for Jesse) was doing some mind-reading.]

BTW - these maps load S L O W!

Let me know if you have any questions.

Thanks,

Paul
